

Alejandro Diaz

Software Engineer building AI systems, machine learning platforms, and data-driven automation solutions.

## PROFESSIONAL SUMMARY

Software Engineering graduate from UPR Mayaguez with professional experience building AI systems, ML pipelines, enterprise software, and large-scale data platforms at Jacobs Engineering.

## EXPERIENCE

Jacobs Engineering - Software Engineer (Jan 2026 - Present)

- Production AI and ML solutions for enterprise engineering workflows
- Document transformation pipelines in Palantir Foundry
- Forecasting and analytics across large-scale infrastructure datasets

Jacobs Engineering - Software Engineering Intern (May 2025 - Aug 2025)

- AI Resume Pipeline: 98% processing time reduction (4+ hrs to ~2 min)
- Water Forecasting Platform: 56% improvement across 1,107 tanks
- Processed 22M+ SCADA records with PySpark and AutoGluon

Jacobs Engineering - Software Engineering Intern (Jun 2024 - Aug 2024)

- Enterprise software and data engineering initiatives
- Automation tooling and data pipeline components

Nagnoi - Data & Software Engineering Intern (May 2023 - Jul 2023)

- Data processing and operational analytics tooling
- ETL workflows and database-driven reporting

## SELECTED PROJECTS

AI Resume Pipeline - 98% time reduction, Claude Sonnet, Palantir Foundry

Water Forecasting Platform - 22M+ records, PySpark, AutoGluon, 56% improvement

OnboardOS - 40+ REST APIs, RBAC, healthcare workflow engine

Local RAG Assistant - Docker, Ollama, local RAG with REST API

## SKILLS

Languages: Python, TypeScript, JavaScript, Go, SQL, Java, C++

AI/ML: LLMs, RAG, AutoGluon, TensorFlow, scikit-learn, Prompt Engineering

Data: PySpark, Palantir Foundry, PostgreSQL, Oracle, Power BI

Web: Next.js, React, Node.js, REST APIs, Tailwind

## EDUCATION

University of Puerto Rico - Mayaguez

B.S. Software Engineering

Minor Certificate in Project Management
